on

New Frontiers in Economic and Financial Research

DATE: 30-31 JANUARY, 2024

Organised By

School of Economics & School of Management Studies

Gangadhar Meher University, Amruta Vihar

Sambalpur-768004, Odisha

India

In association with

**The Indian Econometric Society
(TIES)**

About the University

Gangadhar Meher University (GMU), Sambalpur, came into existence on 30 May 2015 as a unitary institution of higher learning [The Government of Odisha Order No.11598/HE Dated 30.05.2015]. The newly formed University replaced the erstwhile Gangadhar Meher College (Autonomous), one of the oldest and largest in Odisha. The institution's primary mission was to cater to the needs of the poor and underprivileged students of this tribal-dominated region of the State. Under the charismatic leadership of Prof. N Nagaraju, Hon'ble Vice-Chancellor, Gangadhar Meher University made rapid strides to emerge as a premier institution of the State in the domain of higher education culminating in its elevation to the status of a Unitary University.

About The Indian Econometric Society (TIES)

The Indian Econometric Society (TIES) is a registered society under Public Societies Registration Act, formed in 1960. It is one of the oldest and largest body of professional econometricians and quantitative economists with more than 2000 members from all over India and abroad. TIES organizes annual conference where experts from all over India and abroad participate and deliberate on various issues.

About the Schools

School of Economics has been integral to Gangadhar Meher University since its inception as a college. However, the P.G. course was introduced in the session 1966-67. The school hosts currently 05 full-time faculty members and 08 Ph.D. students.

School of Management was started in the year 2003 to develop the managers who can contribute to the societal growth. The department offers MBA, MBA (FM) and BBA.

About the Conference

Economic issues are integral to our material life and often enter the public discourse. Economic research has made significant progress in every sphere of economics related to our life and nation's well-being. Economic research is not specific to quantifiable human behavior but broadens its scope to qualitative and non-quantifiable human behavior.

Currently, economic research covers very broad but heterogeneous study areas. Footprints of progress in research related to human behavior form a separate branch of research, namely Behavioral economics. Research in firm behavior falls under Industrial Organization/economics. New dimensions of research have started on environmental economics and energy economics. Macroeconomic research broadly explains the business cycle and inflation-unemployment dynamics. In addition, much research tries to elucidate poverty, unemployment, human mobility, social marginalization, inequality, and sub-themes of micro-setting. Similarly, we can find stream of research to describe agricultural problems, industry sector issues, and problems related to banking, finance, and international trade. At the same time, development in econometric methodology and techniques acquire specific place in every economic research.

The two-day international conference, 'New Frontiers in Economic and Financial Research.' The conference's objective is to engage young researchers in Odisha in academic discourse on recent developments in economic analysis. We believe that this conference will go a long way in developing an intellectual pursuit and discourse.

Conference Themes

- Recent Developments in Behavioral Economics
- Research in Poverty, Unemployment, Inequality, and Marginalization
- Contemporary issues in Agricultural Economics, Industrial Economics, and Service sector Economics
- Progress in Financial Economics
- Developments in Environmental Economics
- Issues in Indian Economic Growth and Public Policy
- Macroeconomic Policies and their Impacts.
